

Individual custody & open bonded warehouse

OZL Offnes Zolllager in Liechtenstein AG offers the possibility of individual safekeeping of precious metals in domestic storage at several certified locations in the Principality of Liechtenstein. In addition, there is also the possibility of safekeeping in the bonded warehouse (often also referred to as duty-free warehouse). This enables the storage of precious metals (silver, platinum, palladium) free of VAT.

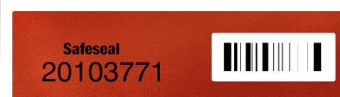

Individual custody

Your physical precious metals are kept completely separate from other customers' holdings and stored within our own designated storage facility.

This ensures for 100% that our clients only receive back the precious metals that they originally handed out to us for safekeeping.

The clients stock list includes the assignment of the bar numbers, or in the case of coins, the seal number of the sealed storage boxes.

For silver, the system is basically the same, but the box is replaced by a pallet. On the stock list, the individual bar is also listed with weight, producer, purity, serial number and storage location.
